1. Using the Laplace transform determine, and sketch, the voltage across the inductor from 0 to 1 us. (5 points)

## 12-2.1 Definition of the Laplace Transform

The symbol  $\mathcal{L}[f(t)]$  is a short-hand notation for "the Laplace transform of function f(t)." Usually denoted F(s), the Laplace transform is defined by

$$\mathbf{F}(\mathbf{s}) = \mathcal{L}[f(t)] = \int_{0^{-}}^{\infty} f(t) \ e^{-st} \ dt,$$
(12.10)

| Table 12-2: Examples of Laplace transform pairs for | T > 0. Note that multiplication by $u(t)$ guarantees that $f(t) = 0$ | for $t < 0^{-}$ . |
